MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Request for Additional Information Pertaining
to the Second 10-Year Interval Inservice Inspection Program

In a letter dated July 12, 1989 from Mr John J Stefano, we were requested to respond within 30 days of receipt to the request for additional information pertaining to the second 10-year interval inservice inspection (ISI) program, Revision 9, for the Monticello Nuclear Generating Plant. The purpose of this letter is to request an extension to the proposed schedule.

We will be unable to meet the proposed schedule due to time constraints placed on Monticello plant staff in preparation for the upcoming Monticello refueling outage. The Monticello cycle 14 refueling outage is currently scheduled to run from August 19 to November 5, 1989. Following the completion of the outage plant staff will be able to complete assembly of the information requested by Mr Stefano's letter. The requested information will be submitted for staff review by December 31, 1989.

Please contact us if you have any questions related to our request.
