Information Required for NRC Review of Inservice  
Inspection and Testing Program and Requests for Relief from  
ASME Code Section XI Requirements

Attached you will find 40 copies of Revision Number 3 to our report entitled, "ASME Code Section XI Inservice Inspection and Testing Program and Information Required for NRC Review for Relief from ASME Code Section XI Requirements." This is a revision of our inservice inspection and testing program description and requests for relief submitted to the Commission on March 15, 1978. Instructions are provided for entering Revision Number 3 in copies of the original report.

The purpose of this revision is to revise our Inservice Inspection and Testing Program to:

- (a) Correct errors in the inservice inspection tables.
- (b) Remove size as a factor in examination amount for valves. This is not a requirement of the Code.
- (c) Add inspection of hangers installed during 1978 refueling outage.
- (d) Add testing of instrument line excess flow check valves.

Please contact us if you have any questions related to Revision Number 3 to our Program.
