MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Confirmatory Requirements Relating to Condensation Oscillation
Loads for the Mark I Containment Long Term Program

In a letter dated October 2, 1979 from D G Eisenhut, USNRC, Northern States Power Company was requested to commit, on behalf of the Mark I Owners' Group as a whole, to perform confirmatory condensation tests in the Full-Scale Test Facility.

In a letter dated November 30, 1979 from Mr L J Sobon, General Electric, to Mr D G Eisenhut, USNRC, the Mark I Owners' Group commitment to conduct a limited number of additional confirmatory full-scale tests is documented. Please reference the November 30, 1979 General Electric letter in the Monticello Nuclear Plant Docket No. 50-263 as NSP's commitment to participate in this Mark I Owners' Group activity.

In a letter dated October 31, 1979 from Mr D G Eisenhut, USNRC, to L O Mayer, NSP, it was requested that we provide a schedule for submittal of the LTP plant-unique analysis for the Monticello plant within 30 days of receipt of the NRC letter. The November 30, 1979 General Electric letter stated that the plant-unique analysis depends in part on final resolution of all acceptance criteria; therefore, the schedule for submittal of the plant-unique analysis will be provided following final resolution of certain concerns stated in that letter.
