MONTICELLO NUCLEAR GENERATING PLANT  
Docket No. 50-263 License No. DPR-22

Revised Schedule for Submitting  
Evaluation Required by the Fire  
Protection Safety Evaluation

Sections 3.2.3 and 4.3.1.2 of the Monticello Fire Protection Safety Evaluation Report issued by the NRC Staff on August 29, 1979 contain our commitment to evaluate the adequacy of the existing fire pump capacity. We were unable to complete this evaluation by the scheduled date of December, 1979 and inadvertently omitted reporting this fact to the Commission in our letter dated December 31, 1979 which discussed rescheduling of other evaluations and information submittals. Completion of the Three Mile Island Lessons Learned category A procedures and modifications has required us to defer submittal of the pump capacity evaluation. The evaluation is essentially completed and is currently being reviewed. It will be submitted by February 1, 1980.

Please contact us if you have any questions concerning our revised schedule for submitting this evaluation.
