MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Status of NUREG-0737, Item I.D.1, Control Room Design Review

Monticello is participating in the BWR Owners' Group generic control room design review program. This program was described to members of the NRC Staff at a meeting in Bethesda, Maryland on March 10, 1982, with the BWR Control Room Improvement Committee.

We are currently awaiting NRC Staff comments on this meeting. We are unable to establish a schedule for completion of the Monticello control room review until the generic control room review program is finalized. Schedules and other information related to our control room design review will be submitted as determined by the outcome of NRC Staff and Control Room Improvement Committee discussions.

Please contact us if you have any question related to our schedule for supplying this information.
