MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Submittal of Process Control Programs for
ATCOR and Chem-Nuclear Mobile Solidification System
(Proprietary Information)

Five copies of two proprietary Process Control Programs (PCP's) for solidification processes which may be used at the Monticello Nuclear Generating Plant are being submitted for your review. These PCP's are required by the Technical Specifications we have proposed to implement the requirements of 10 CFR Part 50, Appendix I, and 40 CFR Part 190.

An additional non-proprietary PCP for the DCM cement-sodium silicate system was included with our revised Technical Specification submittal of July 23, 1982.

Attached are affidavits stating the reasons for requesting exemption from public disclosure of these two documents. If you have any questions related to this submittal please contact us.

Re: "Chem-Nuclear Systems, Inc. Document SD-OP-003
"Process Control Program for CNSI Cement
Solidification Units"

AFFIDAVIT SUBMITTED IN SUPPORT OF REQUEST THAT
THE ABOVE DOCUMENT BE WITHHELD FROM
PUBLIC DISCLOSURE PURSUANT TO
10 C.F.R. § 2.790

STATE OF WASHINGTON)
) ss:
COUNTY OF KING)

DAVID G. EBENHACK states as follows on behalf of Chem-Nuclear Systems, Inc.:

1. I am the Director of Regulatory Affairs of Chem-Nuclear Systems, Inc. ("CNSI").

2. I have reviewed and am familiar with the contents of the document entitled "Process Control Program for CNSI Cement Solidification Units", CNSI Document No. SD-OP-003, and submit this affidavit in support of the request by Northern States Power Company that portions of this document be withheld from public disclosure.

3. The information contained in the document provided, as described hereinabove, has been held in confidence by CNSI as follows:

CNSI has always maintained confidentiality with regard to the design and operation of its mobile solidification units. The proprietary information contained in the above document is not available from public sources.

4. The information contained in the above document is of a type customarily held in confidence by CNSI, and there is a rational basis for such confidentiality as follows:

CNSI has devoted extensive resources to the development and improvement of its radioactive waste disposal services. It is customary for CNSI to maintain confidentiality concerning services maintained for particular customers and originators of radioactive waste both for the protection of such originating entities and also to protect the competitive position of CNSI.

5. The information described hereinabove was transmitted to the Commission and received by it in confidence as follows:

The document was forwarded along with Northern States Power Company's license application.

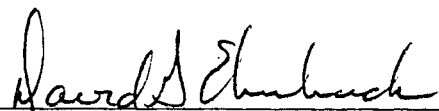

6. The information contained in the above document is not available in public sources as follows:

The document contains a complete description of the CNSI mobile solidification unit, including hardware, chemical usages, and adjustment data, and formulas, all of which are set forth as proprietary information.

7. Public disclosure of the document requested to be withheld from such disclosure is likely to cause substantial harm to the competitive position of CNSI as follows:

CNSI has devoted extensive resources to the development and improvement of its radioactive waste disposal services. Release of the above document to the public would afford competitors of CNSI an unfair advantage and would cause substantial harm to the Company and loss of the benefit of past investment of financial resources including engineering costs. Company employees agree, as a condition of employment, to maintain and keep company proprietary information confidential. The information contained in the document is not available through public sources.

8. For the reasons set forth in the affidavit, CNSI respectfully requests that the Nuclear Regulatory Commission withhold the above document from public disclosure as permitted under 10 C.F.R. § 2.790(b)4.

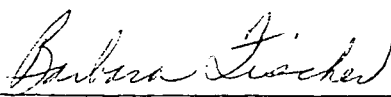

DAVID G. EBENHACK, Director
Regulatory Affairs

STATE OF WASHINGTON)
) ss.
COUNTY OF KING)

On the 15th day of April, 1982, before me personally appeared David G. Ebenhack, to me known to be the Director of Regulatory Affairs of Chem-Nuclear Systems, Inc., the corporation that executed the foregoing instrument, and acknowledged said instrument to be the free and voluntary act and deed of said corporation, for the uses and purposes therein mentioned, and on oath stated that he is authorized to execute said instrument.

IN WITNESS WHEREOF, I have set my hand and affixed my official seal the day and year first above written.

NOTARY PUBLIC in and for the State of
Washington, residing in Bellevue.

Mr. James R. Miller
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
Washington, DC 20555

SUBJECT: TRANSMITTAL OF ATCOR TOPICAL REPORT NO. ATC-132A-P-A FOR THE ATCOR
RADWASTE SOLIDIFICATION SYSTEM; AFFIDAVIT IN SUPPORT FOR PROPRIETARY
SECTIONS

Dear Mr. Miller:

ATCOR Engineered Systems, Inc. requests that the sections of ATCOR's Topical Report No. ATC-132A-P-A entitled "The ATCOR Radwaste Solidification System", listed on the attached, be maintained as confidential in accordance with the requirements of 10CFR2.790. These sections contain information which should be withheld from public disclosure since they contain information which ATCOR routinely considers to be proprietary. Disclosure of this information to the public domain could cause substantial harm to ATCOR's competitive position and would release information to competitors which was developed at considerable cost to ATCOR.

The attached describes all those paragraphs and sections that are to be considered proprietary information.

Your cooperation in maintaining the confidentiality of the above chapters is appreciated.

Sincerely,

ATCOR ENGINEERED SYSTEMS, INC.

Martin Brownstein
Martin Brownstein,
President
