Additional Information Related to NUREG-0737,
Items I.A.2.1 and II.B.4

In a letter dated December 30, 1982 we were requested to provide additional information related to our upgraded reactor operator and senior reactor operator training program (NUREG-0737, Item I.A.2.1) and our training program for mitigating core damage (NUREG-0737, Item II.B.4). The requested information is provided as an attachment to this letter.

Please contact us if you have any questions related to the information we have provided.

Question B.1

The requalification program for reactor operators and senior reactor operators has lectures which appear to cover the subjects of heat transfer, fluid flow, thermodynamics, and mitigation of accidents as called out in Enclosures 1 and 3 of Denton's March 28, 1980 letter. Do these lectures in fact cover this material and is the coverage to the level of detail spelled out in Enclosures 2 and 3 of the Denton letter?

Response

Enclosure 2 to Denton's March 28, 1980 letter, specifies training in heat transfer, fluid flow and thermodynamics. These subjects are covered by our training and requalification programs. These subjects are addressed at the level of detail expressed in the Denton letter of March 28, 1980.

Question B.2

Please answer Question 1 of A above, with respect to your requalification program.

Response

This question has been addressed in the response to question A.1.
