Michelle Hiatt, CNMT
Radiation Safety Officer
Medical Consultants
2525 W. University Avenue
Suite 300
Muncie, IN 47303

Dear Ms. Hiatt:

Enclosed is Amendment No. 03 to your NRC Material License No. 13-32412-01 in partial accordance with your request. Please note that the major changes made to your license are printed in **bold font**. As noted during our telephone conversation with your designated contact person, Patrick J. Byrne, DABR, CHP, DABSNM, the amendment is limited to the removal of two Authorized Users previously listed on the license. **The partial action is due to the lack of any copy of the Certification Board of Nuclear Cardiology certificate for Sai Devarapalli, M.D., in support of your request. Accordingly, we are unable to add Dr. Devarapalli as an Authorized User, at this time.** This action is without prejudice to resubmission.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U.S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

You will be periodically inspected by NRC. Failure to conduct your program in accordance with NRC regulations, license conditions, and representations made in your license application and supplemental correspondence with NRC will result in enforcement action against you. This could include issuance of a notice of violation, or imposition of a civil penalty, or an order suspending, modifying or revoking your license as specified in the General Statement of Policy and Procedure for NRC Enforcement Actions. Since serious consequences to employees and the public can result from failure to comply with NRC requirements, prompt and vigorous enforcement action will be taken when dealing with licensees who do not achieve the necessary meticulous attention to detail and the high standard of compliance which NRC expects of its licensees.

NRC's Regulatory Issue Summary (RIS) 2005-31 provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS, the NRC's electronic document system. Pursuant to NRC's RIS 2005-31 and in accordance with 10 Code of Federal Regulations 2.390, the enclosed license document is exempt from public disclosure because its disclosure to unauthorized individuals could present a security vulnerability. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/ri200531.pdf> and the link for frequently asked questions regarding protection of security related sensitive information may be located at: <http://www.nrc.gov/reading-rm/sensitive-info/faq.html>.

The enclosed document contains sensitive security-related information.
When separated from this cover letter this letter is uncontrolled.

M. Hiatt
