Subject: IW030 Interaction with Southwest Compact

I talked with Ms. Kathy Davis, Director of the Southwest Compact on Friday, September 30, 2011 regarding the September 2 letter to her requesting views on IW030 (the import of disused radioactive sources by GE-Hitachi for recycle, forensic testing and disposal). She had talked with the legal counsel for her Compact and determined that they had no comment on the import of this material. I informed her that it is NRC standard practice to reach out to all potentially affected States and Compacts. She appreciated the outreach and indicated that she was not going to reply in a written response.
