Subject: Request for additional information to remove Dr. Randall Blackburn as an AU

(NOTE: This will be used as the Documents Title in ADAMS)

The licensee requested to remove Dr. Randall Blackburn from the license. Dr. Blackburn is the only authorized user for 35.400 materials. I spoke to Kimberly Wilfong, the Nuclear Medicine Technologist, and explained that they cannot be authorized for 35.400 materials without a 35.400 authorized user, or I would need to list the 35.400 materials for in storage only. Ms. Wilfong said that they have not performed any brachytherapy procedures in years (at least since 2007). They had been authorized for Pd-103 (authorized by a state license) and I-125 seeds for permanent implants. I asked if they had any brachytherapy materials on hand. She checked their inventory and said no. I recommended that they remove 35.400 materials from their license at this time. I explained that they could request to add it back on at a later time when they have an authorized user. Ms. Wilfong agreed this was the best course of action. I asked that senior management of Davis Memorial Hospital submit a signed letter requesting to remove 35.400 materials from their license and to confirm that they do not have any of these materials on hand.

Action Required: Wait for additional information and then process amendment.
