Oct. 31, 2011

For Distribution to The Chairman and the full Commission:

In light of the Fonsi finding for Nuclear Fuel Services, Erwin, TN, that was made public last week, I am at a loss to determine how such a finding could be put in the public domain and could so disrespect the poor people of these communities. With that in mind, I am respectfully requesting a formal response from The Commission on how such a finding of a company that has abused these communities for almost 60 years could be produced. If you are not aware, I am here to inform you that outside testing has confirmed the radioactive assault on our communities. As NFS continues to add on to the dilapidated and legendary plant - how can there be a Fonsi with all the inspection reports, shut downs and accidents from your own inspectors? It gives the appearance that the NRC is disregarding their own inspectors and reported accidents and that the NRC is actually promoting bad actors. Again, I am requesting a formal response from the commission for the rationale of said Fonsi.

Respectfully submitted,

Park Overall
