DPR-22
Amendment 48

US Nuclear Regulatory Commission
Attention: Document Control Desk
Washington, DC 20555

MONTICELLO NUCLEAR GENERATING PLANT
Docket No. 50-263 License No. DPR-22

Implementation of Amendment No. 48 to DPR-22
Technical Specification Change for Offgas System Trip (TAC 61659)

Amendment No. 48 to the operating license for the Monticello Nuclear Generating Plant dated December 1, 1986 authorized the relocation of the offgas system hydrogen monitor trip function from the recombiner train trip logic to the offgas compressor trip logic. The amendment was to become effective when the required changes were made during a plant shutdown. We were requested to inform the Commission within seven days of the date the change was made.

The logic changes authorized by Amendment 48 to DPR-22 were completed during a recent plant maintenance shutdown which ended January 12, 1987. Technical Specification changes issued with Amendment 48 are therefore effective.
