Agree. Site impacts refers to site risk (vs unit risk which we've traditionally considered). DE should participate. Can we set up a meeting next week?

I do not have a good understanding of the strategy to be discussed for item 2 (integration of SOARCA, LIII PRA, Seismic and Site Impacts). The different groups may understand their own pieces but the strategy for how the pieces are to be integrated is not clear. I think a meeting involving senior management from the divisions with the leads of the various pieces to discuss the strategy will help us develop a good CA note. Also, I am not sure what site impacts is and should DE be involved in this?

Subject: SOARCA, LIII PRA, communication tools.

We had a mini-alignment to discuss SOARCA, LIII PRA, communication tools.

We decided:

-**Prior to the 6 Oct** brief to Magwood, RES will draft a **CA note** which will: 1. Discuss the specifics of the next steps for SOARCA (essentially slide 7 of your TA brief, with info) 2. Also discuss the strategic path forward including what items or tentacles (as Brian calls them) will be addressed at the end of June 2011 time frame that will be coming up as a policy paper (this will include SOARCA, LIII PRA, seismic, site impacts) 3. Inform - the items that will be addressed in June will thus necessitate moving the LIII PRA date from February 2011 to later.

We need to ensure we do NOT discuss policy options, merely the subjects we need to consider. The EDO office would need to get this **no later than 4 October** to look at it. Because of the new items, the original date of 29 September is changed to 4 October.

-the **delivery and timing** of the information for **SOARCA** has **not** changed from our previous alignment. The end of October will be the SOARCA draft analysis delivered by EDO daily with ML number; the draft releases to the public in January; and results of uncertainty analysis in the following months ---remain unchanged. This extension request is in routing.

-After the CA note above, process the **extension request to move the Level III PRA** from February to June-July 2011.
