Is this the meeting you guys were fighting over going to? ;-)

Anything you want to hear about from Shaun's presentation at the meeting?

Kathy,

I recently took over as the "Regulatory and Safety Cross cut Manager" for the DOE fuel cycle technology program. Hopefully you have received an invitation to the annual meeting in Gaithersburg at the end of the month. I am on the agenda and plan to review the work that the NRC has recently been doing on regulatory gap analysis relevant to fuel cycle facilities. I would like to get your advice on what you think would be interesting/relevant content for that presentation.

I would also like to put on my SOARCA PI hat and discuss that project with you briefly.

Do you have any time this week that it would be convenient for me to give you a call?

Best regards,

Shawn
