Subject: Facility Closure

Roberto J. Torres
Senior Health Physicist
U.S. Nuclear Regulatory Commission - Region IV
Division of Nuclear Materials Safety
Nuclear Materials Safety Branch B
612 East Lamar Boulevard, Suite 400
Arlington, Texas 76011-4125

License No. 42-26928-01

Dear Mr. Torres:

1. In response to your email, the survey and wipe drawings and documentation submitted are for the old facility at 35495 Country Road 134, Fairview, Montana is the correct facility we do want removed from the license. Internally we refer to as the Sidney facility even though it is located in Fairview, MT.
2. The isotopes that were being stored at this facility were Ir-192, Sc-46, and Sb-124 unsealed sources in a solid form.

Sincerely,

Will Williams
Corporate Radiation Safety Officer

Torres, RobertoJ

To: Williams, Will
Subject: Request for additional information

Mr. Williams:

I am processing your request to remove from the NRC license the location identified as 35495 Country Road 134, Fairview, Montana. The decommissioning documentation submitted with the request identifies the location as Sidney, Montana (the new location) instead of the location that you want to release (Fairview, Montana).

1. Please provide decommissioning information (area survey, wipe surveys, soil samples, etc.) pertaining to 35495 Country Road 134, Fairview, Montana.
2. State what type of radionuclides and physical form (sealed and unsealed) were ever stored at this location.

You can provide your response in a signed and dated letter by reply email as a pdf file. Do not send hard copy in the mail if you provide your response via email. Thank you.
