Yes and we need to press ourselves to get the grant in place.

I think we need to press NAS—they cannot take 3 months to staff the committee and we need to get things moving before January. Please ensure the group is results oriented and they don't look at this as an exercise that can linger. We need the results so we can communicate to the public who is watching and waiting.

Thanks,

Jennifer

Hi Kathy,

The grant should be in place by September and then committee selection begins. The committee selection usually takes 1 month, but we anticipate this to be a contentious process so we are thinking 3 months. The first meeting should be in DC in January 2011, followed by four additional meetings in Chicago, Boston, Atlanta, and LA over the next 12 months.

Do we have any sense of a timeline/schedule from NAS yet? Thanks!

We will obviously probably have an RES program review meeting in the February, 2011 time frame. Presuming we go forward with the SOARCA uncertainty study, that would put the completion of SOARCA also in the early Spring, 2011 time frame. Do we anticipate having a public briefing for the Commission on this? Somehow I think it would be good to showcase a project we've been working on for 5+ years. Also, do we anticipate we will have anything to report out on the phase-1 part of the Cancer study before June, 2011?

For your planning – if you could get back to me by the 29th, I'll collate the input.

Subject: INPUT NEEDED - Possible Future Commission Meetings

All, we have been asked to provide input regarding future Commission meetings from January to June 2011. Please work with your offices and provide input to me by **July 30th**. I have attached a document which contains some meetings that have been discussed. Please include with the input the topic, the timeframe desired, and whether is it tied to a paper or rule that will be coming before the Commission.

I will consolidate the list and send it to SECY.

Thanks,
Jim A.
