Comment:

- No way to Evacuate Area
Earthquake fault
Do not extend - Plenty of SAFE
alternatives - water - solar - wind - Geothermal
Spent fuel - storage - Uranium mining - Dirty
12 years ahead of time - certainly
certainly no way to guarantee safety
Too Expensive
- Deterioration of Cement + rebar - Crumbles over time
- They want increase emissions - Pollutants
- Dirty polluted mine water
- High infant mortality rate + neonatal
- Cancer increases
- Thyroid Cancer rates 70% higher
- Nuclear waste - Nothing Clean

Use other side if more space is needed.

Comment Forms may be mailed to:
Chief, Rules, Announcements, and Directives Branch

U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

- Go back + look at structural
errors when plant
was being built
NRC should not be
considering this so far in
advance - No way to assure
safety - Shut it down -

Do you want to live near Limerick PA?

The I's suppose to be protecting
Comment (Continued): the people's interests -

- Radiation in air + water
- Radioactive ground + water
- Cancer increase esp children
- Deadly waste - above ground + unprotected
- Accidents + leaks - many shut down
- Risk of meltdown - Earthquake
- Flood, Hurricane - Aging equipment
- Updated evacuation plan
- ~~several~~ increased population -
- increase costs - medical problems

Can replace with clean, renewable energy before current license expires

Should have been more public notice of hearing - Mail notices so people have an opportunity to attend

Deplete water due to fracking up river.

Nuclear Energy is Dirty + Expensive
Since Limerick was built we have had some of the most expensive energy - higher rates

7 After Fukushima - Limerick listed as one of top 10 to have very serious problem when we have an Earthquake -

If needed, use additional sheets.

2 Storage of spent fuels - Cooke + Fukushima - similar system

3 Mining + Enriching of Uranium + Plutonium - Dirty -
