Reactor Nos. 30-263 License Nos. DPR-22

## Upgraded Emergency Plans

As outlined in our June 17 letter on advised you of our plan to develop further upgraded Emergency Plans and submit drafts to you by about August 1, 1980. The final form of the new Part 30 rules just recently became available to us, and we decided to incorporate the affect of the new rules in our drafts and hence the slight delay in our submission.

Following regulatory guidance, we are furnishing, for your review, 10 copies of new Emergency Plans that we have drafted to meet applicable rules.
