Development of Draft NUREG-1022, Revision 3

Aron Lewin

Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission

Development of Draft NUREG-1022, Revision 3

Background

- **NUREG–1022, Revision 2 contains guidelines that the NRC staff considers acceptable for use in meeting the reporting requirements of Title 10 of the Code of Federal Regulations (10 CFR) 50.72 and 10 CFR 50.73.**
- **Several identified reporting issues could not be quickly resolved given ambiguities in NUREG-1022, Revision 2 guidance.**
- **Given time spent on issues, a decision was made to revise NUREG-1022.**
- **Expectation is that a majority of issues that required significant resources to resolve will be addressed. Not all issues will be resolved. Items of a lesser significance or that occur infrequently will be evaluated on a case by case basis as they come up.**
- **Draft NUREG-1022, Revision 3 issued for comment on October 13, 2011. Comments due December 12, 2011.**

Development of Draft NUREG-1022, Revision 3

Process

- **Issues identified and inputs solicited from external and internal stakeholders at public meetings.**
- **Initial resolution of issues focused on the actual rule itself, it's associated Federal Register Notice, and staff guidance in that order.**
- **Enforcement or safety considerations then taken into account.**
- **Discussion of Change document and Draft Regulatory Analysis issued along with Draft NUREG-1022, Revision 3.**
- **Advisory Committee on Reactor Safeguards (ACRS) and the Committee to Review Generic Requirements (CRGR) informed of NUREG-1022 activities.**
