

## **NRC DAILY NOTE**

On \_\_\_\_\_, 2015, the U.S. Nuclear Regulatory Commission published a *Federal Register* notice for a proposed rule that would amend Title 10 of the *Code of Federal Regulations* Section 50.55a, "Codes and standards." The proposed rule would update the regulations to include the most recently published revision of Institute of Electrical and Electronics Engineers Standard 603. This proposed rule would affect new standard design certifications, combined licenses, manufacturing licenses, and construction permits after the effective date of the final rule. Applications for license amendments for currently operating nuclear power plants and combined licenses received after the effective date of any final rule may be required, to the extent applicable as specified in the proposed rule, to comply with the revised standard.
