Name of Licensee: Thrasher Engineering, Inc.

Name of Participant(s): Aaron Denham, Andrew Kuncell & Sattar Lodhi

Telephone No. 304 624 4108

Subject: Correct Inventory

(NOTE: This will be used as the
Documents Title in ADAMS)

The licensee requested to increase possession limits. The letter stated that they possessed 15 Troxler Model 3400 series portable gauges, and they have acquired four more Troxler gauges. I noted that in the current license (Amendment No. 10), the licensee is authorized to possess 135 mCi of Cs-137, and 1000 mCi of Am-241 (?) in 3400 series, 3411, and 3241C Troxler gauges. Possession limit of Cs-137 indicates that the license may possess a maximum of 15 Troxler gauges (assuming 9 mCi in each). I called the licensee to verify their correct inventory so that the license could be amended in accordance with the inventory.

The current RSO (Aaron Denham) stated that they do possess 3241 models but he was not sure if they had one or two of the model because it has not been used in a while. I requested him to review their inventory and call me back so that the license could be amended in accordance with the inventory. (The letter also included to change the RSO).

Not having heard from him, I called the RSO-designate to request the correct inventory. He stated that they have Models 3430, 3440 and 3411 gauges, but was not aware of any 3241 gauge(s).

I requested him to review their records and call me back with correct information, including the fate of Model 3241. He promised to call me back either today or tomorrow (11/17) at the latest.
