Information Related to Post TMI Requirements

NUREG-0737 "Clarification of TMI Action Plan Requirements," issued on October 31, 1980 requires the submittal of information for NRC Staff review of the implementation of many of the TMI Action Plan requirements. The schedule for providing this information is summarized on Enclosure (1) of NUREG-0737 for operating reactors. The purpose of this transmittal is to provide the information required for review of the following Action Plan Items:

I.A.1.1(3&4)	Shift Technical Advisor
II.E.4.2(5a&b)	Containment Pressure Setpoint
II.K.3(17)	ECCS System Outages
III.D.3.4(1&2)	Control Room Habitability

In our letter dated December 30, 1980 we committed to provide this information by February 1, 1981. The required information is attached.

Information related to Action Plan Item III.A.2 will be separately mailed the week of February 1, 1981. This will consist of a revised Emergency Plan and a description of a meteorological system intended to meet the first phase requirements of Appendix 2 to NUREG-0654 Revision 1. A description of further upgrading of the meteorological system by staged implementation can be furnished only after final regulatory guidance (Regulatory Guide 1.23 Revision 1 and NUREG-0696 Revision 1) is promulgated.

Please contact us if you have any questions concerning the information we have provided.
