Dear Mr Spessard:

MONTICELLO NUCLEAR GENERATING PLANT  
Docket No. 50-263 License No. DPR-22

In our January 29, 1982 letter we stated that an additional action in response to the violations identified in IE Inspection Report No. 50-263/81-16 was expected to be completed by March 31, 1982. This action was for the Operations Committee to review subcommittee recommendations and identify further actions with respect to the functions of Job Supervisors. Because of other activities, including training, Emergency Plan drills and audits, and the currently in-progress INPO audit, the subcommittee has not completed their work. It is now expected that this action will be completed by April 15, 1982.

Yours truly,

L J Wachter  
Vice President  
Power System Operation  
and Maintenance
