Docket No. 50-263 License No. DPR-22

Revised Response to Notice of Violation  
NRC Inspection Report No. 262/89003 (DRP)  
Fire Detection Instrumentation System Inoperability

The completion date for Corrective Action No. 3 in our response dated April 19, 1989, was not met. The scheduled completion date was April 30, 1990. This item did not receive proper management attention.

The action states:

"All systems important to safe operation of the plant will be evaluated for the risk of their being rendered inoperable due to an undetected loss of power."

In recognition of not completing this work as scheduled, a high priority has been assigned to this project. Completion is scheduled for August 31, 1990. All other corrective actions associated with this violation response were completed as committed.

In order to reduce the possibility of this type of oversight in the future, increased management attention will be placed on the scheduling of NRC commitments.
