Systematic Assessment of Licensee Performance
(SALP) Inspection Report No. 50-263/87001

Reference: Letter dated February 25, 1988 from Mr A Bert Davis, Regional Administrator, Region III, NRC, with SALP 7 Board Report, Inspection Report 50-263/87001

Your letter dated February 25, 1988 solicited written comments related to the Systematic Assessment of Licensee Performance Board Report covering the period June 1, 1986 through November 30, 1987 (SALP 7).

The SALP 7 Report was the subject of a public meeting held at the Monticello Training Center on March 4, 1988. Members of the plant staff and Corporate Nuclear Generation staff offered a number of comments related to the SALP 7 report at this meeting. Northern States Power Company has no additional comments to offer related to the SALP 7 report.

As we noted at the March 4, 1988 meeting, we strongly support the NRC's SALP process. We appreciate the high quality feedback it provides related to operation of our nuclear generating plants. The analyses provided in the SALP 7 report will be used to strengthen those areas where weaknesses are evident and provide further improvements in those areas in which we performed strongly.

C E Larson
Vice President Nuclear Generation
