**MONTICELLO NUCLEAR GENERATING PLANT**  
Docket No. 50-263 License No. DPR-22

**Completion of Plant Modification Work  
with Impact on Emergency Response Facilities**

In NRC inspection report 50-263/94005, Section 3.c, the Staff requested that Monticello notify the Headquarters Operations Officer and the Regional Emergency Response Coordinator of the potential use of the alternate Technical Support Center (TSC) due to modifications to the Emergency Filtration Train in the event of an emergency, the modification start date, and the modification completion date. By letter dated September 12, 1994, from William J Hill (NSP) to the NRC, Monticello provided the planned schedule for the TSC and the backup Operational Support Center (Backup-OSC) modification work as requested.

By this letter Monticello is providing the requested notification that this modification work is complete.

This letter contains no new NRC commitments, nor does it modify any prior commitments.

Please contact Marv Engen, Sr Licensing Engineer, at (612) 295-1291 if you require further information.
