SUBJECT: Summary of November 15, 2011 public teleconference to discuss issues related to the Levy County Nuclear Plant, Units 1 and 2 combined license application.

The U.S. Nuclear Regulatory Commission (NRC) held a public conference call on November 15, 2011 with Progress Energy Florida, Inc. to discuss a draft response to the staff's request for additional information (RAI) related to application sections: 17.4, 19.55, and 19.59. This RAI is publically available and can be found in the Agencywide Documents Access and Management System (ADAMS) Accession number ML11301A214.

Progress Energy Florida, Inc. (PEF) provided an overview of its draft response to RAI question 19-75 asked by the NRC in a letter dated October 28, 2011. PEF proposed making changes its Final Safety Analysis Report Sections; 17.4, 19.55, and 19.59. Senior technical reviewers, Malcolm Patterson and Bret Tegeler, asked several clarifying questions. PEF will modify its RAI response and provide the NRC with an RAI response in the next few weeks.

Several members of the public asked questions and provided comments following the business portion of the meeting. Question and comment topics included the storage of spent fuel, the impact of local mining activities on the Levy County site, the roller compacted concrete (RCC) design feature of the Levy County foundation, and the status of the Crystal River Unit 3 nuclear plant. Two members of the public requested follow-up phone calls and written information from the NRC staff.
