REVISION TO LICENSE AMENDMENT REQUEST (LAR) 10-03108  
Proposed Change to Relocate Administrative Control Requirements Related to Quality Assurance and Submittal of Quality Assurance Program Description (QAPD) – Supplemental Letter

Dear Sir:

South Carolina Electric & Gas Company (SCE&G), acting for itself and as agent for South Carolina Public Service Authority, is submitting a revision to Attachments II and III that were enclosed in the referenced License Amendment Request to the Operating License for Virgil C. Summer Nuclear Station Unit 1 dated March 18, 2011 (ML110810688). The enclosed Attachments provide revised marked-up and re-typed pages of the Technical Specification (TS) index pages for LAR 10-03108. These revised pages supersede the previously submitted index pages and have no impact on the Quality Assurance elements of the original submittal. The TS index pages in the original submittal included editorial changes that were not within the scope of the LAR. This revision to the LAR removes the unrelated editorial changes to the TS index.

Should you have any questions about this submittal, please contact Mr. Bruce L. Thompson at (803) 931-5042.

I certify under penalty of perjury that the foregoing is correct and true.
