Subject: Information regarding areas to be decommissioned

(NOTE: This will be used as the Documents Title in ADAMS)

11/17/2011 (10:40) I explained to Mr. Colagross that the NRC had received a letter dated November 9, 2011, accompanied by a compact disk which provided an FEIS survey but did not refer to which licenses it affected. Mr. Colagross stated that the Authority has been trying to get the parcel of land ready for public auction for many years. The land is covered under NRC LN 41-25370-01. I thanked Mr. Colagross for the information.

(11:05) Mr. Colagross called back. He stated, after reviewing the TVA licenses, he determined that a building containing contaminated turbine parts from a reactor was situated on the land covered by the FEIS. The turbine parts were covered under NRC LN 41-08165-08. Senior management will decide whether the building will remain under the license or the parts will be transferred to another building and the building becomes part of the FEIS. I informed him that if the parts were to be moved and the license specifically has the building in License Condition 10 the NRC would need a specific letter for the request. Mr. Colagross stated that the license specifically mentions the building as a place of storage.

Action Required: Place in ADAMS and the above two licensing packages.
