

U.S. NUCLEAR REGULATORY COMMISSION

STANDARD REVIEW PLAN

13.7 FITNESS FOR DUTY – INTRODUCTION-

REVIEW RESPONSIBILITIES

Primary - Organization responsible for the review of Fitness for Duty

Secondary- None

Section 13.7.1 of the Standard Review Plan (SRP) has been developed to provide guidance for the staff to review and evaluate a reactor applicant's Fitness for Duty (FFD) program to ensure compliance with Title 10 of the *Code of Federal Regulations* (10 CFR), Part 26, "Fitness for Duty Programs." SRP Section 13.7.1 provides a description of the applicable parts of 10 CFR Part 26 that apply during construction for certain persons subject to Subparts A-I, N and O (i.e., an operational or full FFD program). The NRC is also in the process of developing a regulatory guide that describes methods considered acceptable for use in satisfying the requirements of 10 CFR Part 26, Subpart K, "FFD Program for Construction."

Draft Revision 0 – June 2013

USNRC STANDARD REVIEW PLAN

This Standard Review Plan (SRP), NUREG-0800, has been prepared to establish criteria that the U.S. Nuclear Regulatory Commission (NRC) staff responsible for the review of applications to construct and operate nuclear power plants intends to use in evaluating whether an applicant/licensee meets the NRC's regulations. The SRP is not a substitute for the NRC regulations, and compliance with it is not required. However, an applicant is required to identify differences between the design features, analytical techniques, and procedural measures proposed for its facility and the SRP acceptance criteria and evaluate how the proposed alternatives to the SRP acceptance criteria provide an acceptable method of complying with the NRC regulations.

The SRP sections are numbered in accordance with corresponding sections in Regulatory Guide (RG) 1.70, "Standard Format and Content of Safety Analysis Reports for Nuclear Power Plants (LWR Edition)." Not all sections of RG 1.70 have a corresponding review plan section. The SRP sections applicable to a combined license application for a new light-water reactor (LWR) are based on RG 1.206, "Combined License Applications for Nuclear Power Plants (LWR Edition)."

These documents are made available to the public as part of the NRC policy to inform the nuclear industry and the general public of regulatory procedures and policies. Individual sections of NUREG-0800 will be revised periodically, as appropriate, to accommodate comments and to reflect new information and experience. Comments may be submitted electronically by e-mail to NRR_SRP@nrc.gov

Requests for single copies of SRP sections (which may be reproduced) should be made to the U.S. Nuclear Regulatory Commission, Washington, DC 20555, Attention: Reproduction and Distribution Services Section, or by fax to (301) 415-2289; or by email to DISTRIBUTION@nrc.gov. Electronic copies of this section are available through the NRC public Web site at <http://www.nrc.gov/reading-rm/doc-collections/nuregs/staff/sr0800/>, or in the NRC Agencywide Documents Access and Management System (ADAMS) at <http://www.nrc.gov/reading-rm/adams.html>, under Accession # ML113250516.

An additional SRP section addressing these activities will be issued following the issuance of the final regulatory guide. An applicant could elect to apply an operational FFD program to site personnel and activities in lieu of a Subpart K program.

PAPERWORK REDUCTION ACT STATEMENT

The information collection requirements contained and referenced in the Standard Review Plan are covered by the requirements of 10 CFR Parts 26, 50, 52 and 73, which were approved by the Office of Management and Budget, approval numbers 3150-0146, 3150-0011, 3150-0151, and 3150-0002.

PUBLIC PROTECTION NOTIFICATION

The NRC may not conduct or sponsor, and a person is not required to respond to, a request for information or an information collection requirement unless the requesting document displays a currently valid OMB control number.

**SRP Section 13.7
Description of Changes**

Section 13.7 “FITNESS FOR DUTY – INTRODUCTION”

Section 13.7 is a new SRP section not previously included in NUREG-0800. It was developed to provide guidance for the review of Fitness for Duty programs submitted in applications submitted pursuant to 10 CFR Part 50 or 52.
