General Comment

No Relicensing of the Columbia Generating Station.

You can not guarantee our safety in EarthQuakes

the 3.5 in September is considered part of a frequent seismic activity on the fault line where Hanford is.

ON THE COLUMBIA!

not acceptable.

The NW energy depts have said we don't need the 7% generated by the NUKE- we can get by with solar, wind, RES AND MAINLY, TOTALLY, WITH ENERGY cONSERVATION.

a sound NO to Relicensing-
Its not worth the risk.

Sorry no bomb stuff for you.
