Reference: Change in Inventory Amount, License #06-14001-01

Mr. Lodi,

Effective Oct. 31, 2011, there was a change of control of (2) sources of licensed material possessed at our facility from Ahlstrom Nonwovens LLC to Suominen Corporation. Suominen was issued license #06-31456-01.

We would like to change the maximum amount that can be possessed under our license #06-14001-01 to 2.50 curies. This would cover the (3 each) - ABB KR-85 model TG-4 sources currently owned by Ahlstrom, with a total activity of 1.50 curies, and also allow for the temporary possession of an additional 1.00 curie (all new ABB KR-85 sources are currently this quantity) that occurs when we have to periodically replace our sources at the end of their useful life.

Sincerely,

Gary Dzioba
Treasurer, Ahlstrom Nonwovens, LLC
