ORGANIZATION <b>Pacific Gas and Electric (PG&amp;E)</b>				
SUBJECT <b>Discussion of Proposed License Restriction</b>				
SUMMARY (Continue on Page 2)				
<p>The phone call commenced at approximately 5:15 P.M. (EST), PG&amp;E was notified that their were no issues or concerns with their Request for Additional Information (RAI) response (ML112521432). However, because the response to the first RAI in ML112521432 indicated that flammable and/or explosive levels of hydrogen would be present in the GWC when it was finally shipped off-site, the NRC intended to incorporate a restriction in the Humboldt Bay operating license to vent the GWC prior to shipment. PG&amp;E raised no objections but did indicate they may want to discuss it further after reviewing how it might impact operations in the future.</p> <p>The call ended at approximately 5:30 P.M. (EST).</p>
