November 26, 2011

Ms Anne T. Boland, Director
U.S. Nuclear Regulatory Commission
Division of Nuclear Materials Safety
Region III
2443 Warrenville Road, Suite 210
Lisle, IL 60532-4352

Dear Ms Boland:

This letter is in response to your letter of October 21, 2011 requesting additional information regarding the inspection of our office on August 26 and 27.

A. It was identified that the technologist did not wear the assigned finger exposure monitor as required. The technologist in question no longer works for the clinic. The policy is that the nuclear medicine technologist is required to wear the assigned finger exposure monitor when handling radioactive sources. This requirement is being monitored to ensure compliance.

B. It was identified that the technologist did not maintain records of (1) daily GM end of day surveys and (2) weekly removable contamination surveys. The technologist in question no longer works for the clinic. The policy is that the nuclear medicine technologist is required to perform and maintain records of (1) daily GM end of day surveys and (2) weekly removable contamination surveys. The records are being maintained and are being monitored by the medical physicist during random unannounced inspections.

C. It was identified that the technologist did not maintain records of the dose calibrator constancy test. The technologist in question no longer works for the clinic. The policy is that the nuclear medicine technologist is required to perform the dose calibrator constancy test each day the system is used to measure doses. The records are being maintained and are being monitored by the medical physicist during random unannounced inspections.

Sincerely,

Arthur Rose, M.D.
Radiation Safety Officer
