(NOTE: This will be used as the  
Documents Title in ADAMS)

I asked Mr. Coffin about Room L037 which was not on his list. He said that it was change to room number L042B on February 6, 2007. I asked about the Uranyl Acetate used in room A148. He told me that it was obtained under the general license and very small amounts were used. I was confused on his list on where the final status surveys were located on some of the rooms but it was because the room number had changed and I need to look in the comments section to see the room number in the final status survey for some of the old labs that was renumbered.
