SUBJECT			INCOMING
Clarification for the 688 Class Reactor Compartment Disposal Package Review (Docket No. 71-9788)			OUTGOING
SUMMARY			
Naval Reactors: Michael Schultes Nuclear Regulatory Commission (NRC): Jennie Rankin, Daniel Forsyth			
The NRC staff is currently reviewing an amendment request to the 688 Class Reactor Compartment Disposal Package. This telephone conversation was requested by the NRC as a follow-up to the previous telephone conference dated 11/22/11.			
The NRC staff indicated they understood that radiation surveys are taken frequently during decommissioning. This ensures that the package radiation levels are known prior to shipment. The staff requested the supporting documents, or excerpts from these supporting documents, be submitted for staff to review. In addition, the staff requesting clarification on when referenced radiation surveys were taken in relation to shut-down. Naval Reactors stated that they understood the requests and would contact the project manager with a predicted time frame for submitting the information.
