“Diversity In Our Neighborhood”

Plaque in recognition of the NRC as “A Best Diversity Company”

“In problems of high reliability, the fact of divergence may be more crucial than the substance of divergence. Whether team members differ in occupational specialties, past experience, gender, conceptual skills, or personality may be less crucial than the fact that they do differ and look for different things when they size up a problem. If people look for different things, when their observations are pooled they collectively see more than any one of them alone would see.”

“Organizational Culture as a Source of High Reliability”
