Thanks for responding. I got a "no records found" on a search for ML11280A202 -- I cut and pasted the number into the search. Not sure why, but as long as it is the same as what you sent, I am not too concerned.

Thank you,  
Mary

Good morning Ms. Olson,

Yes, the accession number ML11280A202 is to find the same document that is attached. Whenever I save a document from ADAMS to a local file (which I do in order to attach an ADAMS document to an e-mail) a number 1 is added to the document name. I assume you are referring to the number ML11280A20211 which is the title of the document attached. All ADAMS accession numbers are only 11 characters long so you would use ML11280A202 to access this document.

Thank you for informing me of the update to the ADAMS Public link, I will be sure to include that in future e-mails.

Ms Dent:

Am I to understand that the Accession Number ML11280A202 is to find the SAME document you have attached? It does not -- and it is not the same number as that on the attachment you did send.

ALSO, you might like to know that the link to ADAMS Public is also outdated -- it requires a step to go to the Web-Based ADAMS system.

I do not need anything from you except confirmation that, indeed, the instructions are to find the SAME DOCUMENT (if they were to work). If, in fact, you are directing your recipients to a SECOND DOCUMENT, I require further assistance to obtain it.

THANK YOU,  
Mary
