## Baker Hughes Houston Technology Center

November 18, 2011

U.S. Nuclear Regulatory Commission Office of International Programs 11555 Rockville Pike Rockville, Maryland 20852

Attn: Deputy Director

RE: Request for Renewal of Export/Import License PCB4b.04

Dear Deputy Director,

Baker Hughes hereby submits this application for the renewal of the above referenced license for the export/import of Americium 241 Beryllium byproduct material in the form of sealed sources used in the exploration and production of oil and gas wells.

Baker Hughes requests that the NRC Office of International Programs renew the license with the same locations currently on the license. At this time we do not request any additional locations to be listed on this license. We also request that this license be renewed for an additional 5 year period ending in January 31, 2017.

All information provided on the current license regarding the end-use and conditions of use of the sources covered by this license continues to be true and correct.

As part of this renewal application, I have included the required NRC form 7 and proof of financial payment through the NRC website pay.gov.

Any additional information required or any concerns you may have can be addressed by contacting me at your convenience.

Regards,

James Elrod

Radiation Safety Officer
