**Subject:** RE: [WARNING: MESSAGE ENCRYPTED]Revised Draft SE for NEDC-33173P, Supplement 2

We find the additions properly marked for GEH Proprietary information and have no other comments or factual concerns.

The header on pages 25 and 26 needs to be changed to Official Use Only - Proprietary Information.

Jim H

Jim,

Attached is a revised Draft SE for IMLTR Supplement 2. We made two small additions to incorporate the supplemental RAI information that you submitted with the Nov 16, 2011 letter. The added text and the added reference are shown in red text to simplify your review. I have marked the information in the added text that I believe you would consider proprietary to GEH based on the markings in the supplemental RAI responses.

Please confirm that the proprietary information is correctly identified (or provide your own proprietary markings) in the added text and let me know if you have any comments or factual concerns with the additions to the SE.

Thank you,
