Subject: RAI request for extension.

Dear Ms. Montgomery,

Purdue University is requesting an extension on the RAIs sent in response to the relicensing of PUR-1, Docket 50-182. We received the questions after the start of the semester, and the operations and maintenance requirements, teaching load, and the search for a new reactor supervisor have delayed our timely response.

We are prepared to submit answers for the following questions next week: 1, 2, 5, 6, 8, 9, 14, and 26. The end of the semester is approaching and with it more time to address the remainder of the 30 day set of questions. The answers will need to be approved by the oversight committee prior to submission, which will not likely be able to meet until the start of the new semester. Therefore the remainder of the 30-day responses will be able to be submitted by 31 January.

The remaining questions (the 60 and 90 day sets) we will be contacting DOE and Argonne for support on some of the calculations, and we will have a better idea of how long it will take to arrange that assistance and get those answers completed.

Thank you for your consideration of our request. If you have any questions, or require further information, please don't hesitate to contact me.

Sincerely,

Jere Jenkins
