Subject: Victoria Site Audit

Hello!

My name is Tomeka Terry, Environmental Project Manager for the Victoria County Station Early Site Permit (ESP) application, at the NRC for the environmental review. NRC will conduct a site audit for the environmental review of the Victoria ESP application in Victoria, Texas the week of January 9-13, 2012 and would like to invite interested agencies to attend the audit.

The audit will consist of a site tour, some presentations by the applicant, on selected topics, and review of documents made available by the applicant. Although the purpose of the audit is to allow the NRC staff to gather additional information for its review, we recognize that there is great value in having other agencies involved because (1) it allows the NRC staff additional time to work with the agencies and (2) it gives the agencies a good opportunity to see the site and interface with both the NRC and the applicant.

Finally, we do need to manage the number of people who attend the site audit. In general we'd like to limit attendance from each agency to one staff member unless special circumstances dictate that more are needed. If you feel that is the case, please contact me to discuss having additional staff attend the audit. In any case, please let us know who will attend the site audit no later than December 19, 2011. If you have any questions, please contact me at (301) 415-1488 or Tomeka.Terry@nrc.gov.

Background

The NRC is reviewing an application from Exelon Nuclear Texas Holdings, LLC (Exelon) for an early site permit at the Victoria County Station in Victoria, Texas. The application was submitted on March 25, 2010. The Army Corps of Engineers- Galveston District (Corps) is a cooperating agency with the NRC on the environmental review. As part of their reviews, the NRC and the Corps are working together to develop an environmental impact statement (EIS) for the proposed action. Public scoping meetings on the Victoria ESP application were held on December 2, 2010, as part of the scoping process.
