Subject: Request for Additional Information

Dear Mr. Tran,

I'd like to address your questions we discussed earlier today.

First, employees of the NASA John H. Glenn Research Center will not be performing non-routine maintenance on the portable moisture/density gauge that we are in the process of procuring. Performance of any routine maintenance, such as replacement of batteries, mechanical cleaning and lubrication, or replacement of consumable components will be performed by qualified operators in accordance with the manufacturer's operating manual.

Second, the Center requested that our retraining periodicity be changed to biennially in our amendment request letter dated March 6, 2009. The resulting amendment (#44) was issued by Mr. Hueter on June 3, 2009.

Should you have questions or require additional information, you may contact me at (216) 433-6520.

Sincerely,

Christopher J. Blasio  
Radiation Safety Officer  
NASA John H. Glenn Research Center
