Dear Sir:

Please amend license no. 21-26253-01 for:

1. The addition of Co-57 sources for equipment testing. These are NAS model MED3503, max 60 uCi when new. I normally get them when they are less than 10 uCi.
2. Remove Am-241 sealed sources from the license. The last of these sources were disposed of though Los Alamos National Lab in 2007. There are no plans to use these sources again in the future.
3. Remove Co-60 sealed sources from the license. These sources were never used and there are no plans to use them in the future.

If there are any questions please call our physicist Ray A. Carlson, MS at (734) 455-4730 office or (734) 395-7361 cell.

Sincerely,

Ray A. Carlson, M.S., DABR, DABMP
