ARLINGTON, TEXAS 76011-4125

December 6, 2011

NRC Region IV
Decontamination and Decommissioning
Service Provider Licensees

SUBJECT: CORRECTED COPY OF LICENSE

The U.S. Nuclear Regulatory Commission (NRC) has amended your NRC-issued license following the most recent licensing guidance regarding "possession" and "use" of licensed material. Specifically, this license has been amended to clearly state that the licensee is not authorized to take possession of radioactive material from its clients as stated in your application for an NRC license. Other conditions of this license were modified or removed to conform with this change. This license will continue to authorize the use of radioactive material incidental to decontamination and decommissioning (D&D) activities at a client's facility. No further action from your part is needed.

An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(14)(xvi). You should review this license carefully and be sure that you understand all conditions. You can contact me at 817-860-8189 if you have any questions about this license.

NRC's Regulatory Issue Summary (RIS) 2005-31, provides criteria to identify security-related sensitive information and guidance for handling and marking of such documents. This ensures that potentially sensitive information is not made publicly available through ADAMS. The RIS may be located on the NRC Web site at: <http://www.nrc.gov/reading-rm/doc-collections/gen-comm/reg-issues/2005/>. Pursuant to NRC's RIS 2005-31, the enclosed materials license will not be made publicly available.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Roberto J. Torres, Senior Health Physicist
