December 1, 2011

GlaxoSmithKline Biologicals
ATTN: Brian Poletti
Radiation Safety Officer
553 Old Corvallis Road
Hamilton, Montana 59840-3131

SUBJECT: TERMINATION OF NRC RADIOACTIVE MATERIALS LICENSE NO. 25-19852-01

Dear Mr. Poletti:

By letter dated September 13, 2011, GlaxoSmithKline Biologicals – Hamilton informed the U.S. Nuclear Regulatory Commission (NRC) that you wished to terminate your NRC radioactive materials license. The NRC Form 314 dated September 7, 2011, stated that all radioactive material had been disposed using a waste contractor.

The supporting documentation to the NRC Form 314 also provided a copy of the transport manifests for disposal and a decommissioning survey report by an outside consultant. The NRC staff has reviewed the supporting documentation to your NRC Form 314. Based on the documentation submitted and a review of your historical file, the staff concluded that all licensable radioactive material has been removed from the facility and the facility at 553 Old Corvallis Road, Hamilton, Montana 59840-3131, specifically rooms G-209, 109, 113, 122, 124, 128, 315, 359E, 403, 405, 406, and 427, are suitable for unrestricted use in accordance with 10 CFR 20.1402, "Radiological Criteria for Unrestricted Use." Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required.

Please find enclosed Amendment Number 24 to License Number 25-19852-01, authorizing your license termination. This license was terminated concurrently with the issue of an amendment to Strata, Inc. to include the Gillette, Wyoming address. An environmental assessment for this action is not required, since this action is categorically excluded under 10 CFR 51.22(c)(20)(iii). If you have questions on the information stated above, please contact me at 817-276-6596.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,

/RA/

Lizette Roldán-Otero, Ph.D., Health Physicist
Nuclear Materials Safety, Branch B
