MEMORANDUM TO: Stewart N. Bailey, Chief
Safety Issues Resolution Branch
Division of Safety Systems
Office of Nuclear Reactor Regulation

FROM: Blake A. Purnell, Project Manager */RA/*
Generic Communications and Power Uprate Branch
Division of Policy and Rulemaking
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF DECEMBER 7, 2011, MEETING WITH PERFORMANCE
CONTRACTING, INC. AND LICENSEES TO DISCUSS ITS LARGE
FLUME TEST PROTOCOL

On December 7, 2011, U.S. Nuclear Regulatory Commission (NRC) staff held a meeting with representatives of Performance Contracting, Incorporated (PCI) and its partners (the vendor) to discuss technical issues concerning PCI's large flume test protocol (LFTP) for testing pressurized-water reactor containment sump strainer performance. Client licensees of PCI also participated in the calls. This meeting was closed to the public due to the proprietary nature of the discussions.

On October 20, 2011, PCI provided a draft report (enclosed) entitled "Sure-Flow Suction Strainer—Large Flume Test Protocol (LFTP) Element Issues & Resolution." The report is intended to be used as a primary reference source for implementing the refined LFTP by the vendor for a licensee. On November 18, 2011, the NRC staff provided PCI with comments that should be addressed in the final report that PCI submits for review. The purpose of this meeting was to discuss these comments and how PCI intends to address them. In advance of the meeting, PCI provided draft written responses (enclosed) to the comments to facilitate the discussion. The NRC staff stated that PCI's responses would likely address the comments.

PCI stated that it plans to submit the final version of its report by December 16, 2011.
