SUMMARY

After review of PETNET's application for a new nuclear pharmacy license at their St. Louis location, I requested that Ms. Chance submit the following additional information:

- 1. Resubmit the NRC Form 313 (application form) and delete the reference to "First Floor" in Item 3 of the form.
- 2. You submitted a State of Colorado license as evidence of training for Alan Bilbrey but only included page 1 of 4 of the license. Page 1 did not include a list of the authorized nuclear pharmacists. Please submit pages 2 through 4.
- 3. Please identify the material that you would like Dr. Bera to be authorized to use. Include a description of the proposed use for Dr. Bera as well. If his intended use is limited to activities that will be authorized on the production license, then Dr. Bera should not be listed as a user on the pharmacy license. Note that individuals who use material are not necessarily required to be listed on the license and may use licensed material under the supervision, and not in the physical presence of, an authorized nuclear pharmacist.
Delete Dr. Bera as a user on pharmacy license.
- 4. Submit a copy of the lease agreement or letter of understanding or other document that delineates the agreement between St. Louis University and PETNET and defines the roles and responsibilities of both parties with regard to the conduct of licensed activities on the campus of the university.
- 5. Please include in your emergency procedures provisions for contacting local fire departments and local law enforcement agencies.
- 6. Commit to providing refresher training for ancillary staff, or confirm that they will only do work under the direct supervision of an individual named on the license.
- 7. Please address Item 8.11.1, of volume 13 to NUREG-1556 (pages 8-11 and 8-62) that discusses procedures for handling returned waste from customers.
- 8. Resubmit a new "Delegation of Authority" that reflects the new Corporate RSO. Also submit a delegation of authority for the facility RSO.

ACTION REQUIRED

Submit a written response and refer as additional information to Control Number 318794.
