**Subject:** FW: Fluid Release at HH 9-3, Mine Unit 9 on 12-6-11

Doug,

This email is to provide confirmation that you were contacted this day at ~12:30 pm regarding a fluid release in Mine Unit 9, HH9-3. Wellfield Operator discovered fluid release at HH9-3 at approximately 5:40 am on December 6, 2011. Approximately 1779 gallons of fluid was released from what is believed to be a frozen low flow meter run. A gamma survey will be conducted over the release area and soil samples collected. An investigation to the cause will be conducted. Pam Rothwell of the DEQ-LQD has also been contacted as well as Joe Hunter of DEQ-WQD.

Thank you,  
Vickie
