RE: Response to October 17, 2011 letter to update License Renewal Application

Dear Mr. McConnell:

This letter is in response to the October 17, 2011, NRC letter which requested submittal of the SUA-1548 license renewal application within 90 days of the NRC's pre-submittal review conducted on September 19-20, 2011. Power Resources, Inc. dba Cameco Resources (Cameco) has reviewed the NRC comments resulting from the audit that were formally provided October 28, 2011 and has determined that additional time will be required to incorporate these comments which included integrating discussions of the Gas Hills and Ruth projects into the renewal. To fully incorporate the new additional information into the renewal, Cameco is requesting a submittal date of February 1, 2012. With the volume of the application, it is going to take approximately two week interval for the printing and production of the application. Cameco is looking to have a high quality application ready for submittal, and to have everything fully incorporated; therefore, this additional time would be of great value.

The coordination and review that was performed by NRC was much appreciated and it was found to be of great value. Thank you for consideration in this matter and if you have any further questions please feel free to contact me.

Sincerely,

Josh Leftwich
Director Radiation Safety and Licensing
